

Crisis Management & Verbal De-Escalation For Behavioral Health Staff

First Come, First Served

Program Description:

This training will introduce participants to a safe non harmful behavior management system designed to help Behavioral Health staff provide for the best possible care, welfare and safety of assaultive, disruptive or out of control persons. The system developed by the Crisis Prevention Institute (CPI) emphasizes verbal crisis intervention and de-escalation, in addition to non-violent physical intervention techniques that protect the staff member as well as client. Direct care staff and supervisors are encouraged to register for this full day training.

Objectives: (at the end of this session participants will be able to:)

1. Identify the behavioral levels that contribute to the development of a crisis and choose an appropriate staff intervention for each level
2. Identify useful non-verbal techniques in the prevention of acting out behavior.
3. Develop crisis intervention and verbal de-escalation skills.
4. Demonstrate principles of personal safety to avoid injury if behavior escalates to a physical level.
5. Use a model for action after an incident that will bring about necessary closure, debriefing, and re-establishment of a therapeutic relationship with the individuals involved.
