

# ASAM Module 2 – From Assessment to Service Planning and Level of Care

Hosted by: Dr. David Mee-Lee, Chief Editor of The ASAM Criteria

This course helps practitioners understand how to work with a participant's assessment and service planning to identify the best level of care in which to provide his or her services. Skills that reinforce the module's learning objectives are practiced and applied through interactive case studies and Dr. Mee-Lee provides real-world application and description via brief video clips throughout the module.

## Learning Objectives:

- Approach assessment from an individualized, participant-focused perspective
- Explore immediate need, multidimensional and otherwise comprehensive initial assessment
- Identify risk, severity and level of function, as well as target areas of concern and their corresponding services
- Demonstrate how to develop a collaborative service plan with the participant and determine an appropriate level of care placement
- Apply knowledge gained to real-life, clinical situations
